

22 large, high-performance robot variants for greater choice

IRB 6710, IRB 6720, IRB 6730, IRB 6740

Benefit major industries

Automotive

Construction

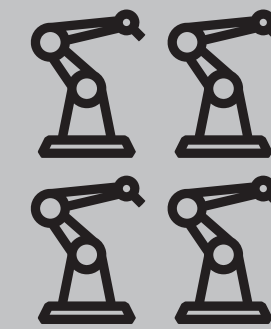

Electronics

Food & Beverage

Metal Fabrication

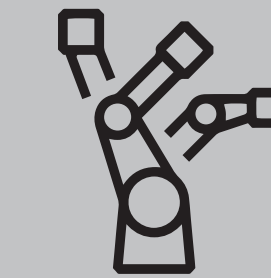

Logistics

Top benefits

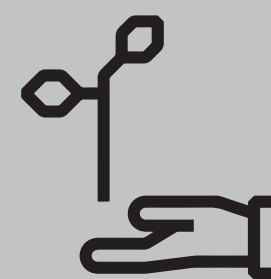

4 new robot families with

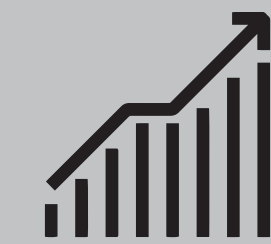

22 powerful variants enabled by modular design

11 of the new robot variants are equipped with LeanID DressPack

Up to **20%** less energy consumption* thanks to lean design and OmniCore™

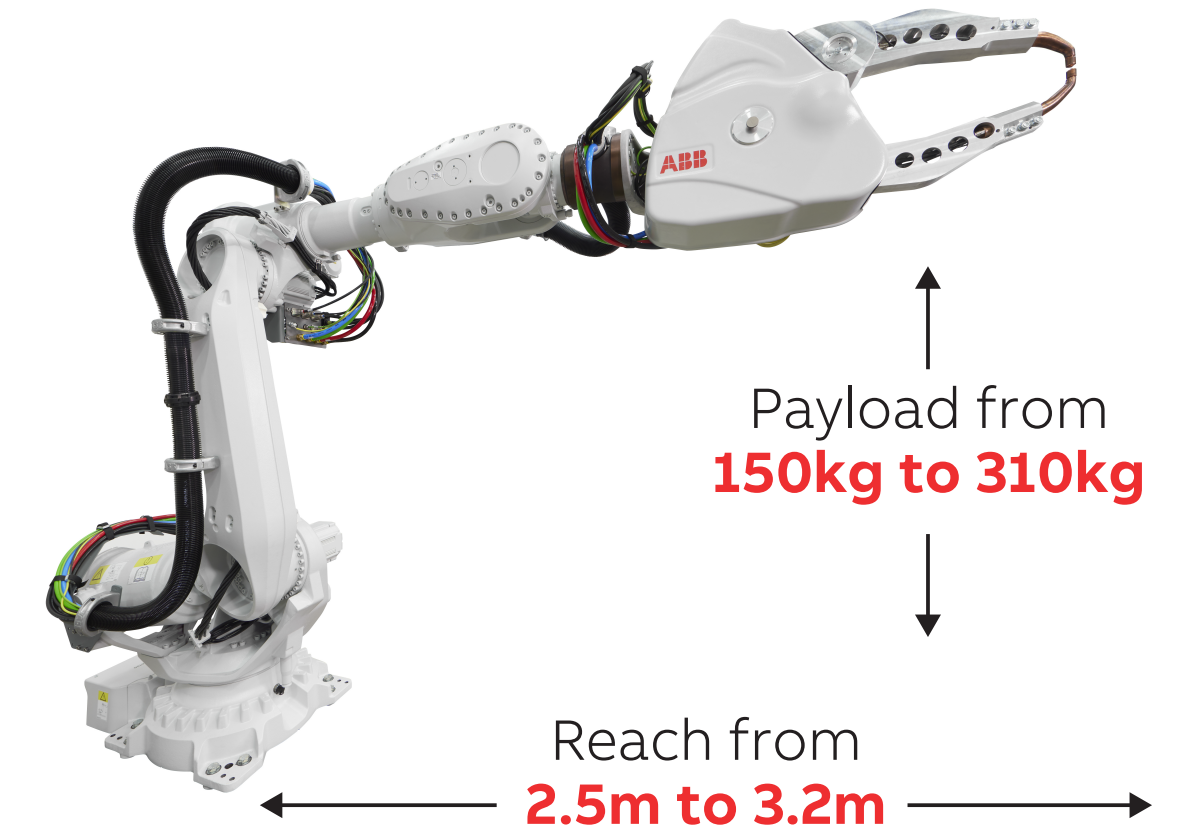

Class-leading position repeatability of **0.03mm**, with outstanding cycle time

Up to **10% lighter**

*Compared with predecessor IRB 6700 on IRC5

Wide range of payloads and reaches for greater choice

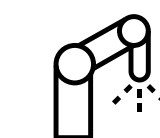

Process applications

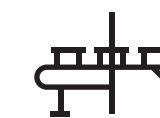

Assembly

Spot welding

Dispensing

Material handling

Machine tending
