

MACHINE ASSEMBLY

2-POINT CHAIN OIL SYSTEM

A customer wanted to eliminate the hassle of brushing oil onto chains. The goal was to reduce the amount of manpower needed to lubricate the machine. GreasePoint and the PennAir Field Service teams installed the system before the next plant production run. The installation will help improve component life, machine accuracy, safety, production, lube efficiency, and reduce waste.

TAKE THE GUESS WORK OUT OF LUBRICATION

GreasePoint delivers Automatic Lubrication systems for mobile off & on road equipment and industrial machinery by providing traditional and custom lubricant delivery equipment installed on site.

THE BENEFITS:

- ✔ Minimize Machine Downtime
- ✔ Safer & Healthier Work Environments
- ✔ Decrease Consumption of Lubrication
- ✔ Lower Maintenance Costs & Repairs
- ✔ Reduce Wear: Extend Equipment Life

GRACO PUMP REPAIR

With the help of our sister brand, PennAir, GreasePoint offers inspection and repair services for your Graco grease and oil pumps. Simply visit PennAir's **factory-trained walk-in service counter** to get back into operations quickly.

Spare pumps can be purchased at a discounted rate to keep lubricants flowing while you wait.

GREASEALERT

GreasePoint's 'GreaseAlert' is an exclusive Industrial Internet of Things (IIoT) remote lubrication monitoring system. It proactively communicates with equipment managers alerting them to potential problems and avoiding catastrophic failures.
